

Smart Waterflow Sensor

Model: HKC X3

Technical specifications:

Flow range: 0.1 m/s to 5.0 m/s

Accuracy: +/- 2.0%

Data storage: daily, monthly, yearly

Analog output: 0/4-20 mA, maximum load 600Ω

Communication interface: RS485

Power supply: 24V DC

Cable length: 1.2 meters

Display: OLED 128*64 screen

Casing material: aluminum alloy

Protection rating: IP54

Weight: 1.5 kg

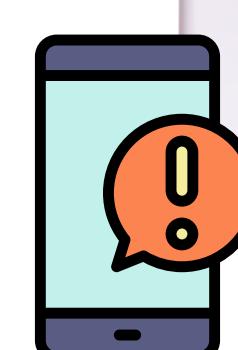

Smart Health Care Solution Smart Waterflow Sensor

The intelligent water flow sensor is a device that can detect the status of water flow and provide real-time monitoring and alerts. When there is an abnormality in the water flow, it can send alerts to caregivers in a timely manner by connecting to the internet or local network. It plays an important role in places that require special attention to the safety and health of the elderly, such as nursing homes or senior citizen housing.

Custom-made for "ageing in place" and all senior care facilities in Hong Kong

Smart Nurse Call System

No Waterflow Alert

Support Web/Android/IOS

If no water flow is detected within the scheduled time period, the system will automatically generate an alarm signal

Caregivers can activate or deactivate the system in the background

Monitoring time and location can be configured

This can prevent accidents where elderly living alone may collapse and be left unattended, leading to fatal consequences.

智能水流檢測器

型號：HKC X3

技術參數：

流量範圍：0.1米/秒至5.0米/秒

精準度：+/-2.0%

數據存儲：按日、按月、按年

模擬輸出：0/4-20毫安，最大負載600Ω

通信接口：RS485

電源：24V直流電源

電纜長度：1.2米

顯示屏：OLED 128*64 顯示屏

外殼材料：鋁合金

防護等級：IP54

重量：1.5公斤

智能樂齡護理系統

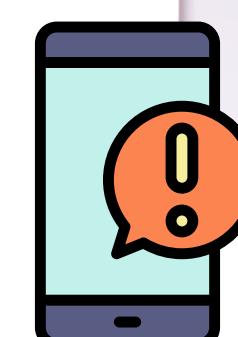

智能水流偵測器

智能水流檢測器是一種可以檢測水流狀態並提供實時監測和警報的設備。當水流異常時，它可以通过連接到互聯網或本地網絡及時向管理員發送警報。在老人院或長者屋等需要特別關注長者安全和健康的場所，智能水流檢測器可以發揮重要的作用。

為『居家安老』 / 全港院舍度身訂造 智慧樂齡管理平台

無水流警報

支持Web/Android/IOS

如果在預定的時間段內未檢測到水流，系統會自動生成警報訊號

照顧者可以在後台激活或停用該系統

監測時間和位置可以進行配置

可預防獨居長者於家中因暈倒而導致失救致死的意外
