

Smart Washroom Motion Detection Sensor (Wireless)

Design and Manufacture by HKC

Benefit?

Motion detection sensor is one of an intelligent smart washroom management equipment. It can prevent accidents caused by accidental faint in toilet compartment. If dynamic sensors are installed in each toilet compartment, once it detected the user does not move in the toilet for more than 10 minutes, the sensor will automatically notify the management staff and issue an abnormal alarm, so that the administrator can call the ambulance for immediate rescue.

Wireless motion sensor
Model No. FA 248 (v2.0)

03/12

- ✓ Easy to use
- ✓ Easy installation
- ✓ Battery powered
- ✓ 10 mins (adjustable) for abnormal alarm
- ✓ Integrate with siren
- ✓ Low-power LoRaWAN remote network connection
- ✓ Connect with door contact sensor
- ✓ Mobile APP/web base alarm system (optional)

**Detection range up to 45 feet,
90° field of view,
Provides all-around coverage
when placed on door frame**

Weight: 0.3 kg

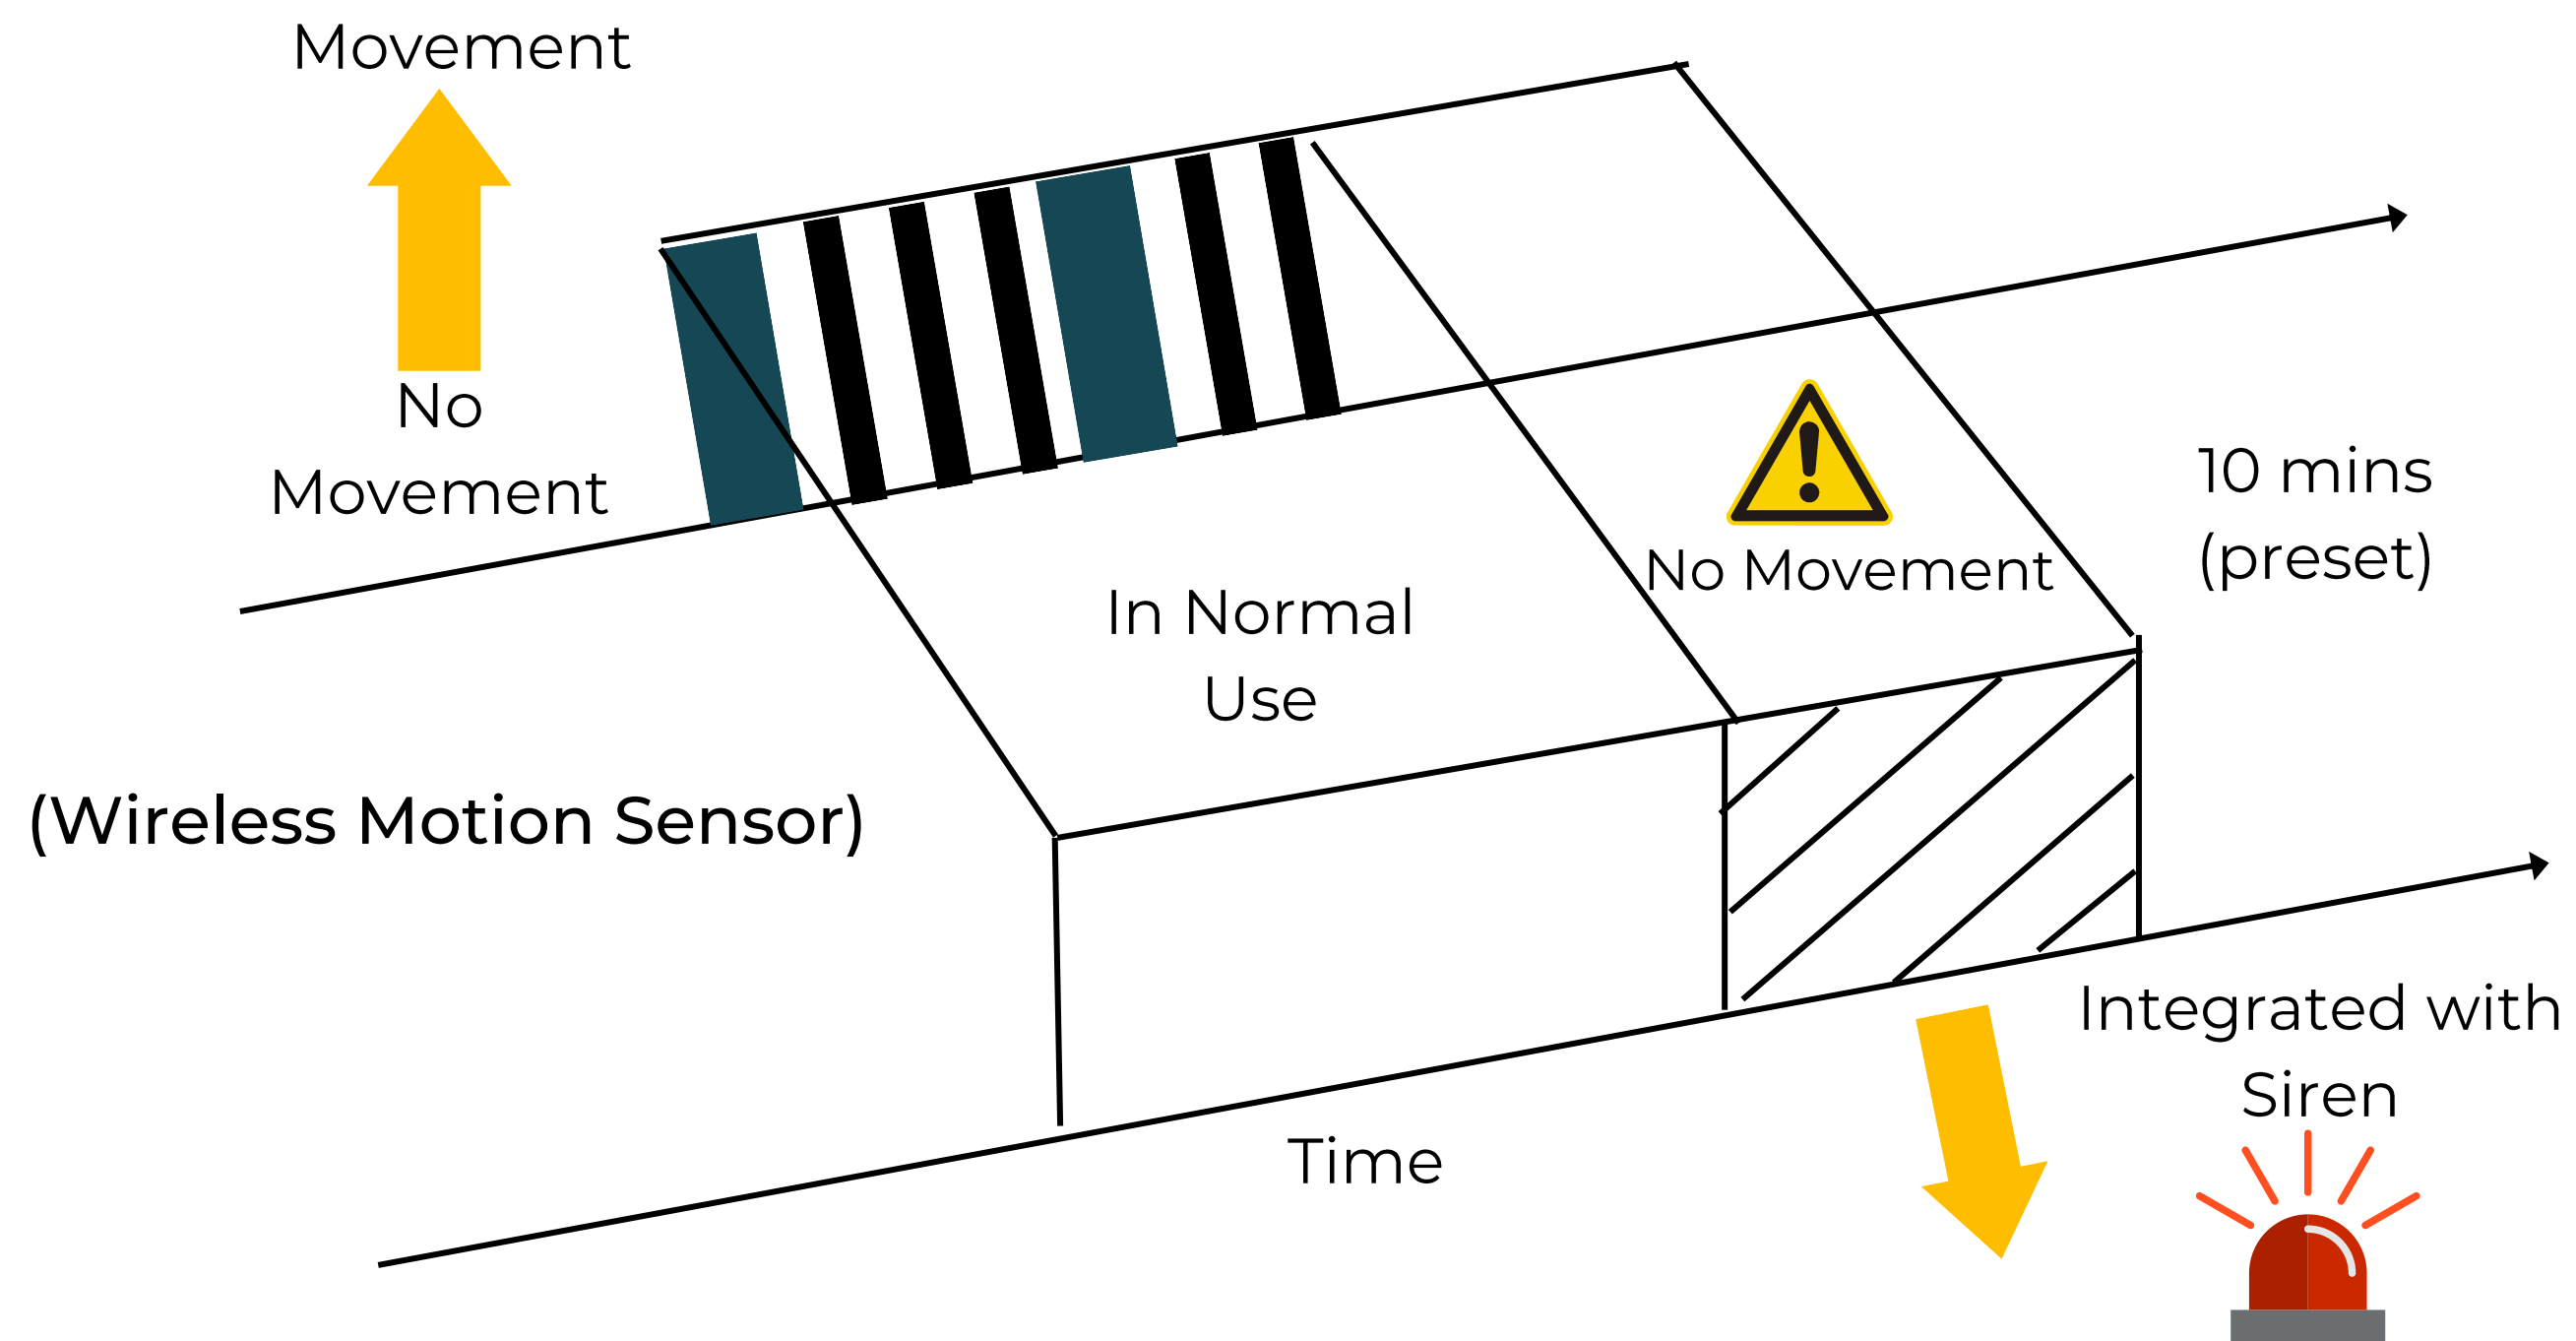

Brand: HKC

Dimensions: 10 x 8 x 2 cm

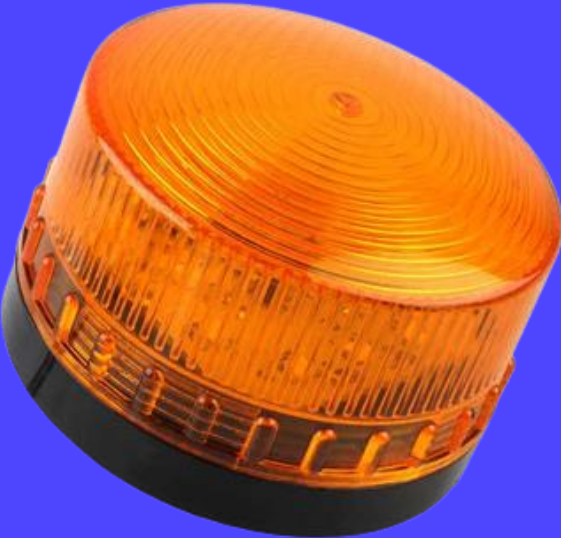

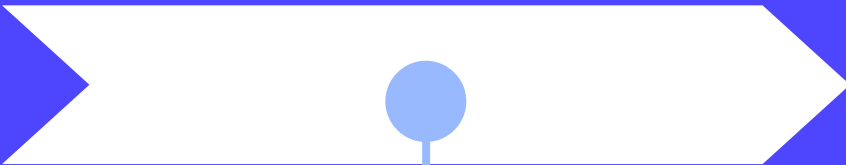

Battery Type: Dry Electric

Can last up to 2 years

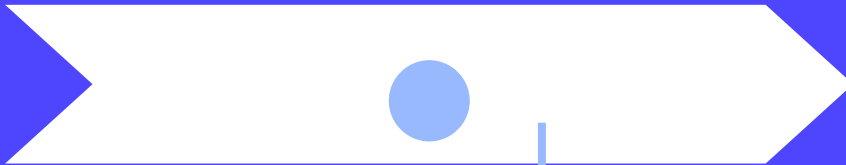

System Architecture

Optional Module

Flashing siren with
horn
Model: HA-86
Power consumption:
24V/220V
Volume: 120db
Wall mount

Cloud base
Alarm system
Mobile APP/web base
alarm system
(optional)
